

# Total Valve Systems offers Shafer Actuator re-furbishment.

Total Valve Systems provides experienced technicians to provide field repair or shop re-furbishment at any of our three locations.

Total Valve Systems facilities and mobile units are fully equipped with all of the essentials to provide high quality and reliable repairs to your shafer actuators.

Our process includes:

- As received photos.
- Unit pre-test.
- Complete report and tracking throughout the repair process.
- Documentation of critical component inspection.
- Any parts found that require replacement will be priced and communicated to the owner for approval prior to installation.
- Reassembly with new grease/oil, gaskets, and seals.
- Functional testing and adjustments.
- Painting
- Final quality control inspection and completion of the documentation package.
